

# MOHAMAD SYAZWAN BIN MOHD SHUKRI

Junior SOC Analyst | CompTIA Security+ Certified

Kuala Lumpur, Malaysia | syazwanshukri1@gmail.com | linkedin.com/in/syazwan-shukri | mosyaz.my

## PROFILE

Junior SOC Analyst with 5 months of hands-on SOC internship experience at Heitech Padu Berhad, monitoring SIEM alerts, investigating incidents and blocking threats across enterprise firewall, WAF and endpoint security tools. CompTIA Security+ certified with a networking foundation (MTCNA) and a Bachelor's degree in Computer System Security. Seeking an L1 SOC Analyst role to grow in threat detection and incident response.

**Core skills:** Alert Triage · Incident Investigation · Log Analysis · IOC-based Threat Hunting · Firewall & WAF Blocking · Endpoint Monitoring · Threat Intelligence

## WORK EXPERIENCE

**SOC Analyst (Intern)** | Heitech Padu Berhad Oct 2024 – Feb 2025

- Monitored and triaged security alerts in **Stellar Cyber** and **RSA NetWitness** SIEM, identifying potential threats for investigation.
- Investigated security incidents by correlating logs, alerts and threat intelligence to determine impact and recommend mitigation.
- Conducted IOC-based threat hunting to detect ransomware, malware and other suspicious activity.
- Contained threats by blocking malicious IP addresses on **Palo Alto**, **Huawei** and **Sangfor** firewalls.
- Monitored **FortiWeb WAF** to detect and block web-based attacks from suspicious sources.
- Monitored endpoint protection in **Bitdefender** and **Trend Micro Deep Security** to protect systems from malware and unauthorized access.

**Telecommunication Drafter Engineer (Intern)** | ECHO Broadband Sdn. Bhd. Mar 2021 – Jul 2021

- Drafted fiber optic network designs using Smallworld PNI, Netwin and Excel.
- Mapped fiber optic routes on geographical maps and produced Single Line Diagrams (SLD).

## CERTIFICATIONS

**CompTIA Security+** | CompTIA Dec 2023

**MikroTik Certified Network Associate (MTCNA)** | MikroTik Dec 2020

## EDUCATION

**Bachelor of Information Technology (Hons.) in Computer System Security** Oct 2021 – Feb 2025

Universiti Kuala Lumpur, Malaysian Institute of Information Technology (UniKL MIIT) | CGPA 3.50

*Dean's List: Semesters 1, 3, 4 and 6*

**Diploma in Electronic Engineering (Data Transmission & Networking)** Oct 2018 – Aug 2021

MARA Japan Industrial Institute (MJII) | CGPA 3.55

*Dean's List: Semesters 1, 3 and 4 · Gold's Award · Director's Award*

## PROJECTS

**Crowdfunding Platform Using Blockchain** | Solidity, MetaMask, Polygon

- Developed a crowdfunding web application using smart contracts on the Polygon Amoy testnet to make fund allocation transparent and tamper-resistant.
- Integrated MetaMask wallet authentication to secure user access and transactions.
- Mitigated OWASP smart-contract vulnerabilities, including integer overflow and unchecked external calls.

**Smart Dustbin Using ESP32 and IoT** | ESP32, C++, Blynk

- Built an ESP32-based smart bin that notifies cleaners through the Blynk app when full, with an automatic lid using ultrasonic sensors, an LED fill-level indicator and audio prompts.

## TECHNICAL SKILLS

|                   |                                                  |
|-------------------|--------------------------------------------------|
| SIEM              | Stellar Cyber, RSA NetWitness                    |
| Endpoint Security | Bitdefender, Trend Micro Deep Security           |
| Firewalls & WAF   | Palo Alto, Huawei, Sangfor, FortiWeb WAF         |
| Networking        | MikroTik RouterOS, Wireshark                     |
| OS                | Kali Linux, Windows                              |
| Programming       | Python, Java, C++, Solidity (basic); Arduino IDE |
| Languages         | Malay (native), English (intermediate)           |
